

Why should the DESIS Ascend Educare Admissions Committee offer you admission over other qualified candidates? *

Although I didn't know it at that time, Four years ago I was given the opportunity to take up Computer Science as my lateral subject only to realize in the present that I will pursue as my career. It all started when I participated in TechRadiance 2018 which eventually changed my pursuit of interest. During that 3-day of hands-on workshops and competing with **100+ teams from all over India** to become a finalist team. I developed a major interest in technology and STEM education.

During all these year, I started learning as well as participating in various competitions but yet I was not able to showcase that efficiently **due to a lack of opportunity and mentorship**. As a student, I am passionate about technology and I believe this mentorship will help me in sharpening my skills. I have tried to utilize all the opportunity that has come in my way and have always tried to stand out through which I was able to a network of students who motivate me to achieve more. Be it participating and winning my first international hackathon i.e GraceHacks or else **mentoring students within my college** as Technical Head in IEEE SIES GST. I have always tried to unravel a path that is far beyond my imagination. I hope the DESIS Ascend Educare mentorship will be a valuable asset to my diverse career journey. I believe I actually stand out from other applicants for my never-stop learning attitude and having a keen interest in whichever field I have been associated with. Be it learning and exploring the field of Quantum Computing or Cloud Computing I have always tried to go above and beyond for passion in technology.

Through this opportunity, I hope that the knowledge and experience gained will always be valuable to my career.
